

Your direct link to Helicopter & UAV Maintenance Professionals

HELICOPTER MAINTENANCE MAGAZINE = 100% MAINTENANCE

Helicopters and UAVs are a flexible asset for many different types of services including EMS, search and rescue, news gathering, airborne law enforcement, fire fighting, air tour operations and more. There is no doubt that in order for helicopters and UAVs to fulfill their missions, they need to be properly maintained!

That's where Helicopter Maintenance magazine steps in. We are the source of information for the thousands of maintenance professionals who keep helicopters and UAVs flying. Helicopter Maintenance magazine continues to be the ONLY magazine with a 100-percent maintenance focus — both content and circulation.

We deliver your message to the largest number of helicopter and UAV maintenance professionals with more maintenance-related editorial content than any other magazine.

OPPORTUNITIES

Four-Page Brochures

Are you considering printing new company brochures for 2023? Let us print your brochures and distribute them to our more than 7,300 readers — allowing you to save money on both printing and distribution! We offer high-quality, four-page brochures that are printed on 100# stock and mailed with our magazine. The price is \$6,500 which includes an additional 5,000 brochures for you. You can order additional brochures for a nominal fee.

Company Spotlight

Available as a two-page spread in the magazine, our Company Spotlight gives you the opportunity to tell your story to our readers. Company Spotlights are printed within the pages of the magazine issue. Price is \$4,400.

Ride-alongs

Several times a year, *Helicopter Maintenance* magazine offers your company an opportunity to insert promotional pieces (brochure, CD, flyer, etc.) shrink-wrapped with a *Helicopter Maintenance* issue that will be distributed at a trade show.

2023 shows are:

- HAI Heli-Expo
- NBAA-BACE

Collective Insight eNewsletter From Helicopter Maintenance Magazine (NEW!)

Helicopter Maintenance magazine's e-newsletter, *Collective Insight*, reaches more than 11,000 opted-in subscribers monthly. Readers receive links to the latest blogs, articles, news and upcoming events. Cost for a newsletter ad (728 x 90) is \$300 per insertion.

Helicopter Maintenance PRODUCTS

Feature one of your products/services in each one of our *Collective Insight* newsletters. Simply provide us with a product photo/logo as well as up to 50 words of text and we will feature it in the Products section of the newsletter. Cost for each product is only \$250/product/month.'

COLLECTIVE Insight

CDB Instruments

For more than 45 years, CDB Instruments, Inc. has sold non-destructive inspection equipment. Company owner Charles Bayless, along with internationally known aerospace expert John P. Hall, are excited to be joined inspection equipment with the latest technology for engine and airframe inspections. The company's G-Pro Series VideoScopes replace old standard borescopes with a clear color — a videoScope all with INTERCHANGEABLE PROBES that work from the same base unit and monitor. Customers can purchase different size probes built in diameter and working length that can be changed in seconds, making this one of the most versatile inspection equipment available. For more information, contact cdbinstruments@gmail.com.

Heliladder™

Heliladder™ increases maintenance efficiency while reducing the risk of injury and maintenance costs. This industry-leading hybrid ladder-alum offers the portability of a ladder, complemented with the wide wings, safety handrails and rock-solid stability of a work stand. The cammed structure wraps around aircraft fuselages, providing unobstructed maintenance access to rotors and helicopters. These rotors provide exceptional load and FOD control. Heliladder is uniquely OSHA compliant when used with correct (not commercial) ladders because over-reaching is not required. The new modular, height-adjustable MDC is now available. Heliladder: Focus on your work, not your balance. Contact Dale Neuhauer at (641) 647-5937 or visit www.heliladder.com.

Corrosion Control Solution

ACF-50 is a complete affordable-to-service corrosion preventative and control program (PCP) solution for airframe, avionics and ground support equipment. ACF-50 has been tested by commercial airlines and government agencies across the world. Heliladder offers complete annual corrosion treatments and the ACF-50 logging process. ACF-50 kills corrosion on contact. For more information, visit www.lanchem.com.

Industry News

NBAA and ASP Technologies Launch Emergency Response System
The National Air Transportation Association, in partnership with ASP Technologies, announces the release of the Safety Test Digital Emergency Response System™. The System is a cutting-edge digital tool that allows aviation businesses to prepare for, and respond to, emergency situations with an expedient level of effectiveness.

Machlids to Offer Hands-On Demonstrations of its Products at HAI Heli-Expo 2022 Booth 445B
Machlids announces it will showcase for the first time its hands on engine display at HAI Heli-Expo 2022's to new portable DPU 7-2010 High Definition Digital Processing Unit (DPU) with its engine manufacturer-approved ISO 3-3-10-10-20m VideoScope. www.machlids.com

AD GUIDELINES

PDF

The PDF format is the preferred format for file submission. Careful attention must be paid to the proper creation of PDF files to ensure that they will reproduce correctly.

Please contact your sales representative for specifications on creating proper PDF files.

ACCEPTED NATIVE PAGE FILE FORMATS

Page Layout Application – InDesignCS, QuarkXPress. *Helicopter Maintenance* accepts current versions of InDesign and QuarkXPress files. Ads should be created to correct ad size dimensions. If you are unsure of the ad size, please contact us.

Vector Art Programs – Adobe IllustratorCS, Macromedia Freehand. *Helicopter Maintenance* accepts current versions of Adobe Illustrator files, and Macromedia Freehand 9. Files should

be saved as an “Illustrator EPS” or as an “editable EPS” in Freehand. Supply all final vector EPS files that are used within the page layout application.

Photo Imaging Programs – Adobe Photoshop CS. *Helicopter Maintenance* accepts current versions of Adobe Photoshop files. We prefer four-color images be saved as composite TIFF files or, if a clipping path is being used, as an EPS file. Supply all images as either CMYK or grayscale high-res (300 dpi) images. Black-and-white line art should be in bitmap TIFF (1,200 dpi) format.

FONTS

Use Postscript Type 1 fonts and include both the appropriate screen and printer fonts that are used in the page file. Avoid using TrueType fonts. Do not apply style attributes to fonts from within page layout application. LaserWriter “City” fonts (i.e., NewYork, Geneva, Chicago, etc.) cannot be used in production. There are no

matching printer fonts. If any customized fonts are used in page files or fonts are used in vector EPS files, both the screen and printer fonts must be supplied.

PAGE FILE PRINT OUTS

Supply final color or B&W laser printouts at actual size (100 percent) with no corrections noted. If the image area in the page file exceeds the size of a laser, the customer should maintain 100-percent output. Tiled proofs can be submitted. If a reduced-size laser is provided, it should be clearly noted.

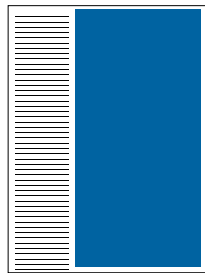

If possible, it’s beneficial to output final printouts with “registration marks.” This places crop marks on the edges of the file, and also prints the name of the file at the top of the page. Note any special instructions directly on your provided laser proofs. If fifth or spot colors (actual PMS color) are to be used, they should be indicated clearly.
